

Summary of Key Changes for AFDP 3-52, *Airspace Control*

- Detailed the connection between airspace control and mission command
 - Described the mission command framework in relation to responsible agents
- Aligned discussion of airspace control operations across the competition continuum
- Included joint all-domain operations (JADO) information to eventually rescind AFDP 3-99, DAF Role in Joint All-Domain Operations
- Strengthened the airspace control planning section to reflect planning during distributed control and the new Air Force Planning Process
- Updated the Theater Air Control System to reflect current airspace control elements
- Added a Theater Air Ground System section to describe how the Theater Air Control System fits into joint force's airspace control system
- Enhanced discussion on airspace control in the maritime domain
- Renamed effects-based approach to operations (EBAO) as "The Airman's Perspective"
