ANNEX 3-17 AIR MOBILITY OPERATIONS

AEROMEDICAL EVACUATION AIRCRAFT CONSIDERATIONS

Last Reviewed: 5 April 2016

Many considerations are taken into account when selecting appropriate aircraft for aeromedical evacuation (AE) missions. Altitude restrictions, configuration, patient load, airfield restrictions, aircraft range and potential [air refueling](#) are key factors. Additionally, AE crew members should be provided combat aircrew flight equipment on the same basis as other aircraft crew members.
